

Dear Parents/Guardians

We are pleased to inform you that the school is mounting the Code for Fun Enrichment Programme for all secondary one students. This 10-hour programme, offered jointly by Infocomm Media Development Authority (IMDA) and MOE, focuses on computational thinking concepts including their application in the real world and in coding. It incorporates elements of design prototyping using microcontrollers and reinforces students' understanding through exposure to practical project work.

The programme will be conducted in five 2-hour sessions in school. The schedule for Class 101 is as follows:

5 April (Tuesday) 3 – 5pm

6 April (Wednesday) 2 – 4pm

12 April (Tuesday) 3 – 5pm

13 April (Wednesday) 2 – 4pm

19 April (Tuesday) 3 – 5pm

The cost of the programme is fully subsidised by IMDA and MOE. Attendance is compulsory.

We believe your child/ward will benefit tremendously from his/her participation in this enriching programme.

Thank you.

Best regards

Mr Loh Yan Xiang

HOD/ICT
