“

My aspiration is to either become a sports management professional, a Karate athlete, or a Karate coach. To work towards this, I decided to apply for the EAE in *Higher Nitec* in Sport Management. This has allowed me to develop useful practical skills while attaining relevant theoretical knowledge such as in the area of sports science and coaching. I believe this has placed me in good stead for a fulfilling sports career!

Brylle Neo Ming Wei

Though I qualified for Secondary 5, I had doubts about my O-Level prospects. Encouraged by my parents to focus on my strengths, I explored my interest in IoT and engineering and chose ITE through the Direct-Entry Scheme to Polytechnic Programme (DPP) – a decision that changed my life.

My time at ITE was instrumental - it gave me the chance to challenge perspectives, grow alongside my peers, and discover my potential. Leading and being a voice for students who often go unheard means a great deal to me. I hope my journey inspires others to take charge of their story and be the light at the end of someone's tunnel.

ITE grads find doors to good jobs opening wider

Survey shows median pay more than doubled in 10 years; more grads also furthering studies

Sandra Davis
Senior Education Correspondent

Students in the latest iteration of Technical Education (ITE) may have taken longer to find a job, but once they do, they are finding it easier to move up the career ladder here.

Compared with their peers who graduated from polytechnics last year, those from ITE took 10 months longer to find a job after leaving school, but once they did, they earned 20 per cent more.

The latest graduate employment survey of students from the National University of Singapore, Nanyang Technological University, Management University Council and their sectoral associations, put the figures at 33.4 per cent for ITE, 21.4 per cent for polytechnics.

ITE grad Umesh Sivanesan completed a diploma in engineering and now works as a senior engineer with TMB Marine.

ITE students' median pay has risen from \$1,800 in 2005 to \$3,700 in 2007, while the number taking up apprenticeships has increased by 16 per cent.

ITE's latest annual survey of 16,000 students also found that 40 per cent of them are now working full-time, up from 35 per cent in 2005.

Mr Sivanesan, 23, graduated from ITE in 2006 with a diploma in marine engineering and now works as a senior engineer with TMB Marine.

Mr Sivanesan said: "I am glad that the government has made ITE more accessible to us. We can now go to polytechnics or universities if we want to, but I think the skills we learn here are more relevant to the industry."

ITE's latest annual survey of 16,000 students also found that 40 per cent of them are now working full-time, up from 35 per cent in 2005.

THE STRAITS TIMES

From ITE to NUS medicine: Ex-dropout makes the grade

Chew Seng Hui had given up on school, but ITE gave him a second chance.

Now he is a medical student at the National University of Singapore (NUS), having overcome his past to become one of the best students in his class.

Mr Chew, 21, was a dropout from secondary school. He had been failing his subjects and was eventually asked to leave. He then became a part-time delivery boy for a food delivery service.

He then joined ITE, where he studied engineering. He said: "I wanted to go to university, but I didn't know what to do. I was lost." He then joined ITE, where he studied engineering. He said: "I wanted to go to university, but I didn't know what to do. I was lost."
